Keep it Clean

Helping kids stay on top of their chores

USER STORY

“When its time to clean up the house, I want to lock the TV with a chore and task list, so that I can curb procrastination and focus on accomplishing chores for myself and my family members.”

APPROACH

Intuitive: The app should be straightforward and easy to understand especially considering that it will be focused on engaging children to do housework.

Presentation: White space and bold type faces should be utilized so the user can understand what is happening on the screen, even from across the room

Illustrative: To keep children invested, illustrations and vector images/icons will be featured throughout the application

FLOW

Open App › View Chores Lists ›

Preview Chores List › Lock Screen ›

Check-Off Chores › Type in Password ›

Congratulations!
